

Learn A Word Day

The day was celebrated on 23rd of October Monday. Students were very much excited. They were told the importance of learning a new word and how could they implement in their daily usage of a language.

Different activities were conducted in each section which helped the students to learn new words.

They were asked to read a lesson Sea Transport with their peers and find the words which were new for them. The new words were written on the board and explanation was given by showing the related images to them. They were given colourful cutouts in which they wrote a new word and enjoyed drawing the pictures. They shared their word with their peers and most of them used in sentence making. They were curious to know the meaning of the word which was new for them.

This activity was helpful for them in learning a language and likeness for reading.
